I claim:

30)

1. A telescopic leg ladder comprising:

a leg ladder with two vertical legs;

a plurality of horizontal steps;

of 164,

each leg having a telescopic device that allows the leg(s) to be extended;

112

a securing locking device that will fix the extended leg of the ladder;

a foot pad attached to the floor pad of the telescopic extension device;

pads on the upper edges of the ladder; and

a mechanism consisting of sliding rods from the rungs of the ladder in order to hang objects.

2. The teleseopic leg ladder as claimed in Claim 1 wherein the telescopic device is a threaded screw mechanism.

The telescopic leg ladder as claimed in Claim 1 wherein the telescopic device is a slide tube mechanism.

4. The telescopic leg ladder as claimed in Claim 1 wherein the telescopic device is a spring loaded mechanism.

5. The telescopic leg ladder as claimed in Claim 1 wherein the telescopic device is a hydraulic mechanism.

The telescopic leg ladder as claimed in Claim 1 wherein the securing device is a metal pm.

7. The telescopic leg ladder as claimed in Claim 1 wherein the foot pad is covered with small pointed studs for increasing its grip on uneven terrain.

Control 7

- 8. The telescopic leg ladder as claimed in Claim 1 wherein the pads on the upper edges of the ladder are fitted with rubber to increase its grip and stability.
- 9. The telescopic leg ladder as claimed in Claim 1 wherein the pads on the upper edges of the ladder are fitted with plastic to increase its grip and stability.
- 10. The telescopic leg ladder as claimed in Claim 1 wherein the mechanism to hang objects includes hanging toole
- 11. The telescopic leg ladder as claimed in Claim 1 wherein the mechanism to hang objects includes hanging hang paint cans.
- 12. The telescopic leg ladder as claimed in Claim 1 wherein the mechanism to hang objects includes hanging nail holders.
- 13. The telescopic leg ladder as claimed in Claim 1 wherein the mechanism to hang objects includes hanging tool holders.
- 14. The telescopic leg ladder as claimed in Claim 1 wherein the ladder and telescopic mechanism is produced of aluminum.
- 15. The telescopic leg ladder as claimed in Claim 1 wherein the ladder and telescopic mechanism is produced of fiberglass.
